Chang-Syu Chen

has successfully completed the online Professional Certificate

AWS Generative AI and AI Agents with Amazon Bedrock

This program equips software developers and DevOps engineers with skills in Generative AI and machine learning using Amazon Web Services. You'll gain hands-on experience with Amazon Bedrock, learning to build and deploy Generative AI applications leveraging foundation models, knowledge bases, and intelligent agents. The curriculum covers concepts like language models, tokenization, and natural language processing techniques. You'll learn the architecture patterns for creating generative AI applications using Amazon Bedrock and LangChain, and explore the capabilities of Amazon Q Developer. Through projects, you'll learn to implement text generation, language understanding, and summarization. You'll also work with Amazon Bedrock's advanced features.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
